## PROJECTS

GreenGrocer E-Commerce Management System | *JavaFX, MySQL*

- Developed a desktop-based grocery management system using Java, JavaFX, and MySQL.
- Implemented user authentication, product management, shopping cart, and order processing functionalities.
- Designed the application using MVC and DAO design patterns while integrating JDBC for database operations.
- Generated PDF invoices and barcode-based product tracking using third-party Java libraries.

Flip-Flop Based RAM Design and Simulation | *MATLAB & Simulink*

- Designed and simulated a flip-flop based RAM architecture using MATLAB Simulink.
- Implemented memory addressing, decoder, multiplexer, and seven-segment display components.
- Verified memory read/write operations and system functionality through simulation scenarios.

Data Structures & Algorithms | *C++*

- Solved algorithmic problems using C++ and implemented common data structures.
- Worked with arrays, linked lists, stacks, queues, trees, and graph algorithms.
- Improved problem-solving skills through complexity analysis and optimization techniques.
